The concepts of population dynamics can be applied to the specific case of the human population. It is unlikely that any other population of large animals has ever sustained so much population growth for so long. The human population increased relatively slowly until about 1650 when approximately 500 million people inhabited Earth. The Plague took a large number of lives. Since then, human ...

Key Concepts. As we discuss this, let ' s keep a few key concepts in mind: The goal of the Leeds Method is to naturally sort our DNA into clusters of matches who are biologically related to each other. We hope to get 4 clusters representing our 4 grandparent lines. However, not everyone will get 4 clusters! (In other words, your results may vary!) Many people need to consolidate (or combine ...
